

Madsen Giersing
CONSULTING ENGINEERS

Excellence in marine
structural design

Established in 1988, Madsen Giersing is a leader in marine engineering providing a first class, independent consultancy service.

From initial concept through to completion our project management team work hands on with our clients to achieve the most innovative and effective solution throughout the design phase.

Driven by a passion for excellence and innovation in the design of marine structures and temporary works, our international reputation continues to place us as a leader in marine design.
